QUIKRETE® UNVEILS TROWEL GRADE RE-CAP AND RAPID ROAD REPAIR – CA AT WORLD OF CONCRETE

LAS VEGAS (Feb. 4, 2020) – [QUIKRETE®](#), the leading manufacturer of pre-blended commercial-grade cement and concrete products, strengthened its repair portfolio with the additions of QUIKRETE® Trowel Grade Re-Cap, QUIKRETE® Rapid Road Repair – CA (Calcium Aluminate) and an updated version of QUIKRETE® FastSet™ Repair Mortar. The full line of QUIKRETE products will be showcased at the World of Concrete in booth S10326 at the Las Vegas Convention Center from Feb. 4-7, 2020.

“Billions of tons of concrete are produced in the U.S. annually to build bridges, roads, homes, hospitals, utilities, schools and other parts of the country’s infrastructure,” said Frank Owens, senior vice president of marketing for The QUIKRETE® Companies. “Maintaining such a vast concrete infrastructure is a huge responsibility shared by many including QUIKRETE. With that charge, our world-class R&D team leveraged cutting-edge chemistry to formulate the next generation of QUIKRETE repair solutions the meet the demands of making permanent commercial-grade repairs easier and faster.”

QUIKRETE® Trowel Grade Re-Cap

A special blend of Portland cement, sand, polymers and other proprietary additives, QUIKRETE Trowel Grade Re-Cap is a versatile shrinkage compensated material ideal for repairing spalled, cracked or pitted concrete surfaces from 1/16 inch to 1/2 inch. QUIKRETE Trowel Grade Re-Cap has a bond strength four times greater than the concrete itself. That means a concrete substrate will fracture or crack before its bond with QUIKRETE Trowel Grade Re-Cap. With 30 minutes of working time, one 20-pound bucket will cover approximately five square-feet at 3/8-inch thick and up to 15 square-feet at 1/8-inch thick. QUIKRETE Trowel Grade Re-Cap has a walk-on time of three hours and drive-on time of 24 hours.

Applications
