QUIKRETE® UNVEILS NEW PRODUCTS AT WORLD OF CONCRETE
Environmentally-Friendly Sealants Advanced Formula Concrete Resurfacer Highlight Show

Las Vegas (Jan. 23, 2018) ± [The QUIKRETE® Companies](#), the leading manufacturer of pre-blended commercial-grade concrete products for the building and home improvement industries, is introducing Advanced Formula QUIKRETE® Concrete Resurfacer and QUIKRETE® Advanced Polymer Adhesives at the World of Concrete (WOC). The full line of QUIKRETE® products will be on display at WOC in booth S10326 at the Las Vegas Convention Center from Jan.

faster transform and concrete resurfacer. QUIKRETE® Concrete Resurfacer is a fast-drying or patch addition to existing concrete surfaces, setting a new standard for concrete repair. QUIKRETE®

QUIKRETE® Concrete Resurfacer is a proven shrink-compensated repair material for making thin structural repairs to sound concrete in need of surface renewal. Surpassing the performance of competing products, bond strength tests reveal that a concrete substrate will fracture or crack before its bond to QUIKRETE® Concrete Resurfacer fails. Applied with a squeegee, trowel or brush, one 40 lb bag will cover approximately 17 square feet at 1/4 inches thick or approximately 90 square feet as skim coat. With a walk-on time of eight hours and drive-on time of 24 hours, it can renew a surface for 25 cents per square foot versus more than \$3 per square foot to remove and pour a new slab.
